## Laser Diode Drivers

The LDD series are economic QCW laser diode driver modules designed to provide high current pulses to drive 2m.i.k.r.o.n.<sup>TM</sup> laser modules in various applications. The drivers deliver output currents up to 200 A and pulse widths variable from 50  $\mu$ s up to 20 ms operation<sup>[3]</sup>. Up to 1000 W average output power is available with the supplied heatsink. Several safety features are integrated to protect both, laser module and laser driver.
